

ENTRY POINT SCREENING DEVICES PRODUCT GUIDE

High-Volume Screening and Access Control Solutions

Customizable features and functions for the optimal screening of employees, contractors, and visitors. Designed to stand alone or be sequenced with existing access control measures.

PAS Systems' Entry Point Screening Devices offer the advanced features and installation options necessary for tailor-made access control solutions.

These completely automated and noninvasive products walk the user through the screening process with easy to understand prompts and verbal commands.

Screening of employees and visitors can help prevent the spread of illness and reduce onsite accidents, making them the ideal solution for visitor management and employee screening in safety-sensitive industries.

KEY PRODUCT FEATURE OPTIONS

- Facial Recognition
- Live Detection
- Fingerprint Scanner
- Alcohol Testing
- High-Speed Detection
- Temperature Detection
- Real-Time Data Upload
- NFC Card Reader
- Wall Mount Design
- Access Control/Gate Entry

SPECIFICATION	KIOSK	WALL MOUNT
Size	128 x 18 x 236mm	200 x 220 x 88mm
Weight	2.8 lbs	2.7 lbs
Temperature Accuracy	±0.54°F	±0.54°F
BrAC Accuracy	0 - 0.10% BrAC ±5% 0.10 - 0.15% BrAC ±8% >0.15%: ±10%	0 - 0.10% BrAC ±5% 0.10 - 0.15% BrAC ±8% >0.15%: ±10%
Facial Recognition Time	< 1 second	< 1 second
Alcohol Measurement Response Time	5 seconds	5 seconds
Memory (in device)	5,000 test records 20,000 registered faces	20,000 test records 10,000 registered faces
Network	WiFi, 4G (optional), Ethernet	WiFi, 4G (optional), Ethernet
