# ENTRY POINT SCREENING

## High-Volume Screening and Access Control Solutions

**PAS offers advanced features in its Entry Point Screening Device with installation options necessary for tailor-made access control solutions.**

Temperature screening is the ideal solution for managing visitors and employee screening in safety-sensitive industries. Screening of employees and visitors can reduce the risk of illness spreading and reduce onsite accidents.

PAS's completely automated and noninvasive product will walk the user through the screening process with easy to understand prompts and verbal commands. Customizable features and functions for the optimal screening of employees, contractors, and visitors. Designed to stand alone or be sequenced with existing access control measures.

**ISO 9001 2015 CERTIFIED**

## KEY PRODUCT FEATURES
