ALCOVISOR

TRAINING GUIDE

PAS Systems offers a range of comprehensive breath alcohol training courses through a convenient online training platform, taught by highly knowledgeable trainers.

The US Department of Transportation (DOT) has strict guidelines for the alcohol testing of its transportation workers and PAS training programs meet, or exceed, established DOT standards for training.

Breath Alcohol Technician (BAT) Training Course

Alcovisor Online BAT Certification includes:

- DOT Alcohol Testing Rules and Procedures via online computer based learning
- Instrument Proficiency Introductory training via online computer based learning
- Webinar (with live trainer) for mock proficiency demonstration

After completion of the Breath Alcohol training course, a BAT certificate is issued.

Screening Test Technician (STT) Training Course

Alcovisor Online STT Certification includes:

- DOT Alcohol Testing Rules and Procedures via online computer based learning
- Webinar (with live trainer) for mock proficiency demonstration

At the successful completion of all course content, the operator will receive STT certification.

Instructor Training Course

This advanced course will provide certification as a breath alcohol technician and allow the student to train and certify other individuals within their organization to become Breath Alcohol Technicians, in accordance with U.S. Department of Transportation's 49 CFR Part 40.

After completion of the standard BAT certification, the student will be provided with additional materials and teaching tools to aid them in the training of others. Instructor training is completed via webinar and after successful completion, an instructor certificate is issued.
